

D-A ULTRA-FINE MICROFIBER POLISHING PAD

Boost the cutting power for finishing on hard paint with the D-A ULTRA-FINE microfiber polishing pads. The unique microfiber polishing material, combined with an extremely soft foam interface, allows this pad to boost the defect removing power of ultra-fine polishes, like RUPES UNO PURE, while still delivering a consistent and clear finish on medium-to-hard clear coats. Use with RUPES UNO PROTECT to remove moderate defects, polish the surface, and deposit durable polymezer protection in one easy step.

▷ TIPS FOR SUCCESS

- Prime the pad by applying a thin, even layer of compound to the face before the first use
- Reload the pad with small amounts of compound, typically only a few drops. Over-saturating the pad with compound can lead to diminished performance
- Clean pads frequently during use with compressed air, a vacuum, or RUPES Claw Pad Tool to maintain consistent performance
- After use, clean with warm water and a mild soap, rinse well to remove residues, air dry
- Best use on factory-applied paint
- Not recommended on fresh paint. Not recommended for use with rotary tools
- Apply up to 30/45 second cycle time in an area no larger than six times the pad diameter
- Use minimum two pads per vehicle, swapping in 15 minutes intervals
